-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Hariguchi (6,181,698).

As per claims 1, 9, 17 and 25, Hariguchi discloses receiving the message; requesting a destination address for the function instance from a local repository; whenever the destination address is local, sending the message to the function instance; whenever the destination address is remote, packaging the message with the destination address and sending the packaged message to the function instance; and whenever the destination address is not found, requesting the destination address for the function instance from a remote repository, packaging the message with the requested destination address and sending the packaged message to the function instance (column 1, lines 45-50, column 9, lines 46-57, column 13, lines 40-49).

As per claims 2 and 10, Hariguchi discloses sending the message to a queue for delivery of the message to the function via a dispatcher (figure 8).

Art Unit: 2144

As per claims 3, 11, 19 and 27 Hariguchi discloses storing the destination address (column 1, lines 11-24).

As per claims 4, 12, 20 and 28, Hariguchi discloses label/identifier (column 7, lines 5-20).

As per claims 5, 6, 13, 14, 21, 22, 29 and 30, Hariguchi discloses the use of routing table, which is functional equivalent to look-up tables and databases (column 1, lines 43-45).

As per claims 7, 8, 15, 16, 23 and 24, receiving a message remotely or locally is a user's choice (sender).

As per claims 18 and 26, Hariguchi discloses a queue communicably coupled to the messaging agent; a dispatcher communicably coupled to the queue; and the messaging agent sending the message to the function instance by sending the message to the queue for delivery of the message to the function instance via a dispatcher (figure 8, abstract).
